### Discussion

As part of the B771 Contact Record dated 9/3/2003, the path forward for penetrations that remain in decontaminated walls within 6' of final grade was discussed. In this discussion, it is stated that the piping/sleeve will be removed. However, the pipe/conduit/sleeve will not be removed for non-process systems and piping, such as fire protection, conduit, roof drains, etc. Removable surveys shall be performed for remaining stubs, as discussed in the original contact record.

Ms. Onyskiw requested that this clarification be issued.
